***Course of Coastal and Marine Biology and Ecology (LM48, Cl. LM-6)***  
*- Laurea Magistrale in Biologia ed Ecologia Costiera e Marina -*

***General Information***

*Coastal and Marine Biology and Ecology* is a two-year II level course according to DM 270/04, which does not contemplate a fixed number of enrolled students. As specified within the related Schema of Teaching Organization, admission to this Course requires the possession of specific curricular requisites and it is subordinated to the overcoming of evaluation of the adequacy of their personal preparation according to the terms that will be established at the beginning of each academic year and will be made explicit in the admission notification.

To obtain the final qualification, a student must achieve a minimum of 120 CFU's (University Formative Credits) including 30 CFU's related to the final test (which concerns internships or work experience - previously cleared by the Educational Competent Body - at research institutions or universities, public or private companies, may be based on an activity report and does not provide an associated vote, but only an assessment of fairness expressed by the Educational Competent Body).

***Educational activities***

The Course of Coastal and Marine Biology and Ecology includes *5 categories of learning activities* ("B": Core subjects in various disciplines of biology; "C": Training activities in disciplines related to biology and consistent with the educational objectives of the course, plus an integrated interdisciplinary training; "D": Activities chosen by the student; "E": Training activities aimed at preparing the final examination for the attainment of the qualification; "F": Training activities to facilitate the professional choices through direct knowledge of the business sector the diploma may give access to, including, in particular, internships, apprenticeships and guidance) listed in the attached diagram.

The "*activities chosen by the student*" (according to art. 10 fifth paragraph of the DM 270/04), at the second year, will coincide with the teaching / learning activities of any of the courses of study 'University provided consistent with the training of the student. These activities' should be reported by the students by November 10, 2011 following the methods described in Section *Training Offer / Activities in the student's choice*" of the Portal of the Faculty of Science MMFFNN.

The list of courses offered in the academic year 2011/2012 will be available on-line in the section "*Training Offer / Alphabetical list of lessons*" of the Portal of each Faculty (ref <https://www.unisalento.it/web/guest/faculty>).

The course includes the following *prerequisites*:

There are no prerequisites. However, the temporal sequence of courses of instruction given in the Manifesto of the Course, is suggested to the student for the examinations.

Attendance to theoretical lectures is not compulsory, even though it is an essential condition for a fruitful insertion of the student in the didactic organization of the Corso di Laurea Magistrale. Students, furthermore, are bound to attend laboratory activities, stages, seminars and trainings for at least 2/3 of their duration.

The Course includes the following *attendance rules*:

Attendance to theoretical lectures is not compulsory, even though it is an essential condition for a fruitful participation of the student to the teaching organization of the Course. Students, furthermore, are required to attend laboratory activities, stages, seminars and trainings for at least 2/3 of their duration.

### ***Class calendar***

Teaching activities are organized in two semesters.

Classes are so scheduled:

- I semester: from October 10, 2011 to January 20, 2012
- II semester: from March 12, 2011 to June 10, 2012

### ***Acquisition of CFU and Exams***

All activities that allow credits acquisition carry an evaluation. Assessment procedures are made, as appropriate, by either written, or oral, or written and oral tests, or by other procedures suitable for particular types of activity.

The activities of type B, C and D are usually evaluated by a vote out of thirty possibly *cum laude*. For teaching activities involving laboratory exercises, accreditation may be made through evaluation of individual work on subjects related to ongoing exercise, the details of which are given by the instructor and approved by the body responsible for Competent Teaching.

The methods for the above tests are set by resolution of the Competent Body Learning (Educational Council) and illustrated by the instructor at the beginning of the course.

Exams are programmed as follows (during periods of suspension of classes):

- 2 sessions in February
- 1 session in March (by the 10<sup>th</sup>)
- 1 session in June (after the 8<sup>th</sup>)
- 2 sessions in July
- 1 session in September

Students may require extraordinary sessions to teachers in each discipline.

UNIVERSITÀ DEL SALENTO  
FACOLTÀ DI SCIENZE MATEMATICHE, FISICHE E NATURALI  
MANIFESTO DEGLI STUDI A.A. 2011/2012

Students about to graduate may request an extraordinary call before the session of graduation, if no sessions are scheduled.

To be considered on track to graduate, students must:

- a. have applied for graduation according to the terms fixed by the “Segreteria Carriere Studenti”
- b. support a maximum of 14 credits (excluding credits for the Stage and to final thesis) in order to complete their educational path.

The acquisition of CFU of type f) concerning internships or work experience - previously cleared by the Educational Competent Body - at research institutions or universities, public or private companies, may be based on an activity report and does not provide an associated vote, but only an assessment of fairness expressed by the Educational Competent Body.

### ***Sessions Degrees***

Graduation sessions are planned in:

- July
- October
- December
- March and/or April

### ***Knowledge required to access the course; Procedures for verifying the preparation of the student, and professional Career opportunities for graduates***

See the Schema of Teaching Organization of the Course (Ref. [http://www.scienzefn.unisalento.it/regolamenti\\_didattici\\_cds](http://www.scienzefn.unisalento.it/regolamenti_didattici_cds))

### ***Rules of admission to the Course***

The terms will be established at the beginning of each academic year and will be made explicit in the admission notification (Ref. <http://www.scienzefn.unisalento.it/bandiammissione>)
